Regulations and standards can drive the creation of new proficiency testing programs

US OSHA proposes revisions to silica standard

US OSHA proposes revisions to asbestos standard

US NIOSH revises Manual of Analytical Methods

US EPA revises National Emission Standards for Hazardous Air Pollutants

Sharing proficiency testing data, and providing analysis and interpretation of the data from established PT programs to regulators and government agencies, can drive changes to the regulations and standards that are protecting worker health

Not all AIHA Proficiency Analytical Testing Programs listed on this poster are included in our A2LA Scope of Accreditation. Please consult A2LA Certificate #3300.01 for a list of our accredited programs.
